

Hikvision Camera ONVIF Configuration

NOTE: Hikvision DS-2CD5585G0-IZHS camera was used to test this scenario. Other Hikvision camera models may vary

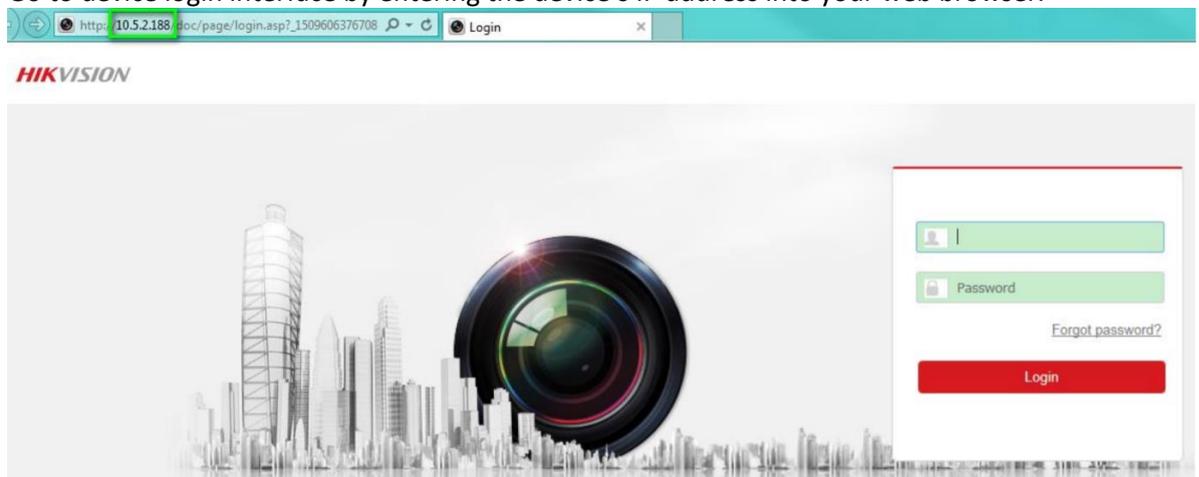

To search for Hikvision cameras on the network download and install the Hikvision Batch tool.

<https://www.hikvision.com/en/support/tools/hitools/TS20200826032/>

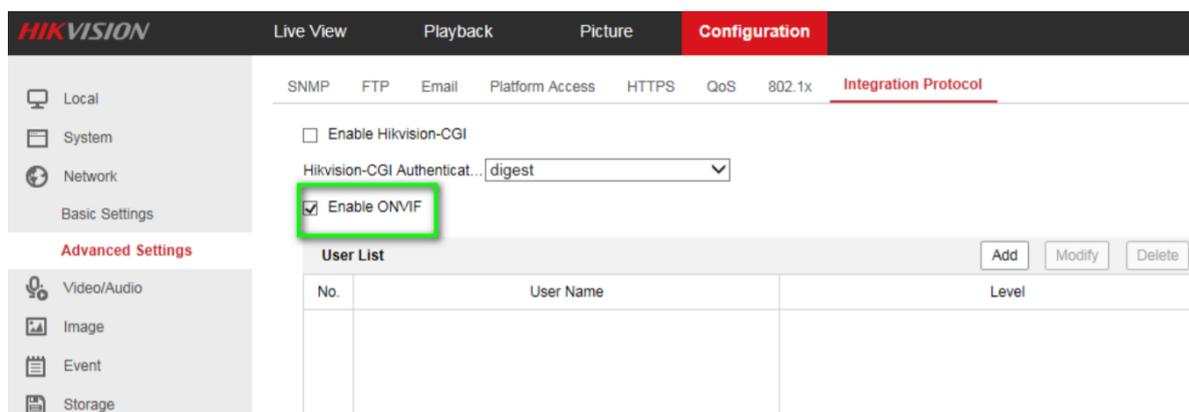

When configuring Hikvision cameras to be added to an IVSEC NVR if the camera will be powered using the IVSEC NVR POE ports ensure that you configure the camera IP addresses to the same range as the IVSEC VLAN range e.g. 10.10.25.x

Hikvision cameras running on the firmware v5.5.0 or higher version have the ONVIF function disabled as default. If you has enabled this function before, it would be turned into disabled as well after the upgrade. This is a guide to instruct you how to enable ONVIF protocol in your camera.

1. Go to device login interface by entering the device's IP address into your web browser.

2. Login in the camera by using your username and password. We assume you did activate the camera before (if not, follow the onscreen instructions).
3. Go to Configuration > Network > Advanced Settings > **Integration Protocol**. Click Enable ONVIF checkbox to enable this function (as shown below).

- Click Add to add new users (up to 32 per device), assign the user level: Media, Operator user and Administrator user.

The screenshot shows the 'Advanced Settings' tab selected in the left sidebar. The 'User List' table is empty. The 'Add' button is highlighted with a green box. The 'Enable ONVIF' checkbox is checked.

No.	User Name	Level

The 'Add user' dialog box contains the following fields and options:

- User Name:
- Password:
- Confirm:
- Level:
 - Media user
 - Operator
 - Administrator

Valid password range [8-16]. You can use a combination of numbers, lowercase, uppercase and special character for your password with at least two kinds of them contained.

Buttons: OK, Cancel

The screenshot shows the 'User List' table with one user added. The 'admin' user name is highlighted with a green box. The 'Add' button is no longer highlighted.

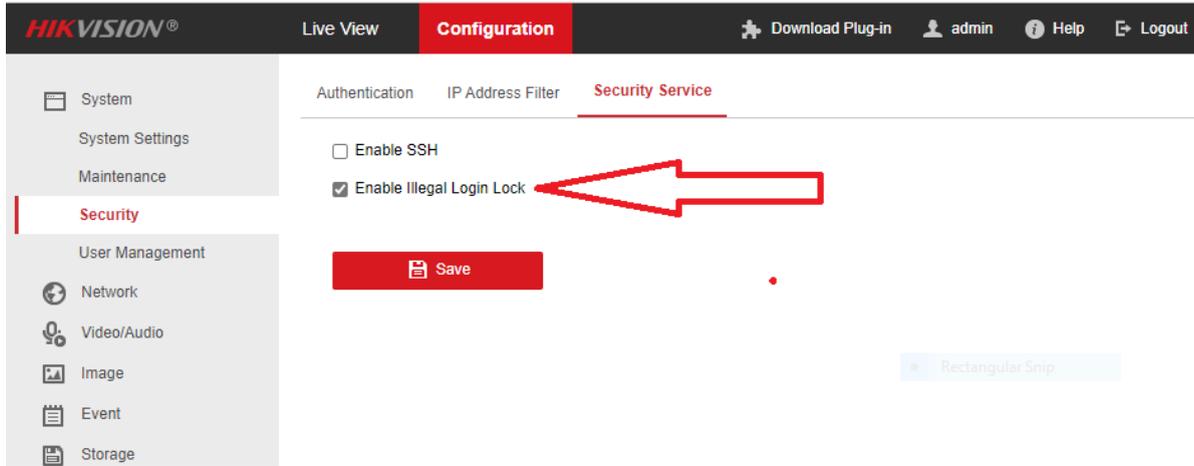

No.	User Name	Level
1	admin	Administrator

ONVIF user management system on Hikvision cameras is independent from device management system. **The user list displays** authorised users and access levels:

- **Media:** have access to get the real-time streaming, get a list of device supported functions, and read configurations (Profiles, DNS, network interfaces, endpoint reference, recordings, serial port and etc.) of the device.
- **Operators:** have access to all settings except: Causing changes to the system configuration, such as setting network default gateway; Causing unrecoverable changes to the system, such as setting system factory default and upgrading system; Reading confidential system configuration information, such as getting system log.
- **Administrators:** have unrestricted access to all settings.

NOTE: When adding a user for onvif select **“Media User”**

NOTE: Ensure that the **“Enable Illegal Login Lock”** option within the Hikvision camera settings is **Disabled**

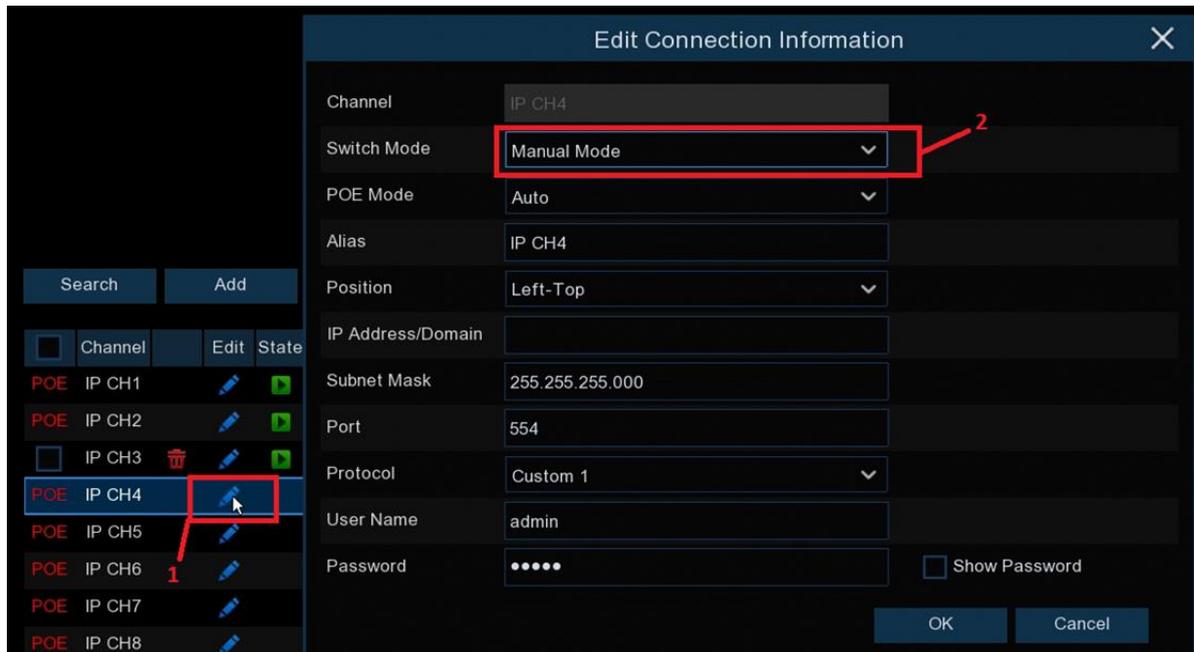

On the IVSEC NVR

Click Setup – Channel – IP Channels

Click on the  icon in the "edit" column.

Set the Switch mode to **“manual mode”**. Click **“OK”**

Add the Dahua to IVSEC NVR using:

IP address of camera

Protocol: Onvif

Port number: 80

Username: admin

Password: The Hikvision camera Password

Example below:

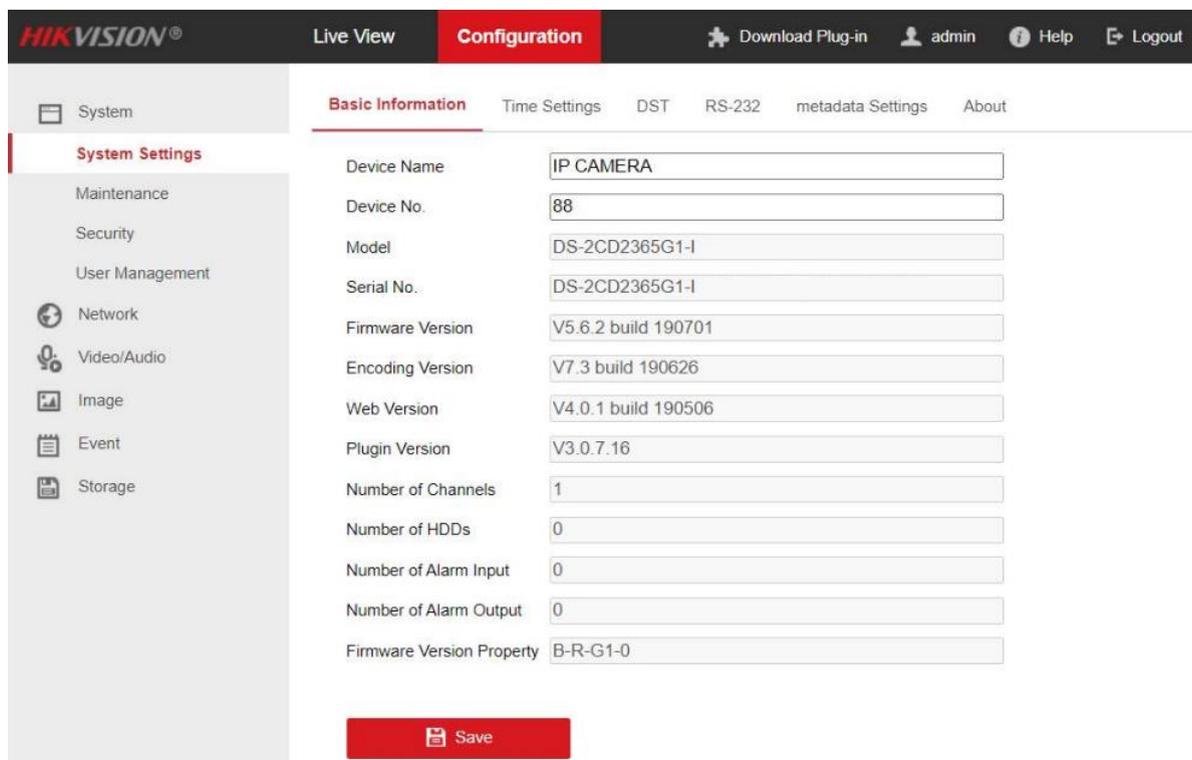

Channel config Wireless camera IP Channels Protocol Manage	
IP Address	10.10.25.167
Client Port	80
Protocol	Onvif
Username	admin
Password	••••••••
	<input type="button" value="OK"/> <input type="button" value="Cancel"/>

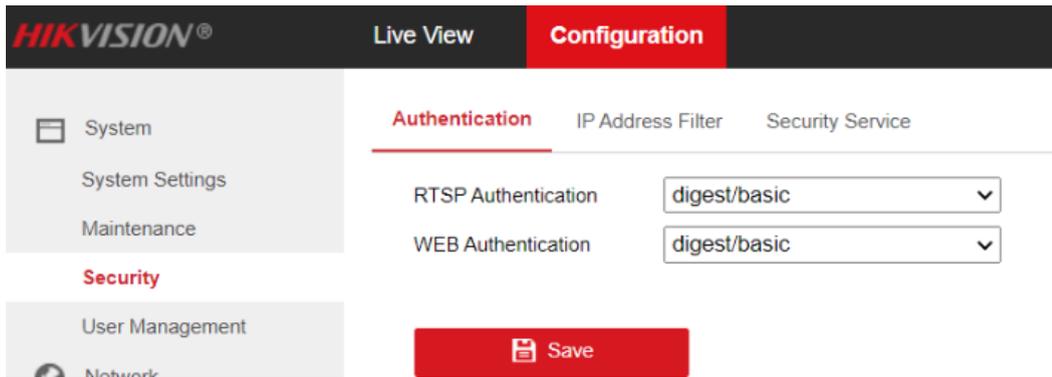

Click [HERE](#) to watch a video explaining how to configure an IVSEC channel to manually to add a camera via onvif protocol (watch from 3min onwards)

Update note - 07/04/2022

Initial test failed to add Hikvision model DS-2CD2365G1-I via ONVIF protocol using above steps

HIKVISION ®	Live View	Configuration	Download Plug-in	admin	Help	Logout
System	Basic Information	Time Settings	DST	RS-232	metadata Settings	About
System Settings	Device Name	IP CAMERA				
Maintenance	Device No.	88				
Security	Model	DS-2CD2365G1-I				
User Management	Serial No.	DS-2CD2365G1-I				
Network	Firmware Version	V5.6.2 build 190701				
Video/Audio	Encoding Version	V7.3 build 190626				
Image	Web Version	V4.0.1 build 190506				
Event	Plugin Version	V3.0.7.16				
Storage	Number of Channels	1				
	Number of HDDs	0				
	Number of Alarm Input	0				
	Number of Alarm Output	0				
	Firmware Version Property	B-R-G1-0				
	<input type="button" value="Save"/>					

Recommend upgrading DS-2CD2365G1-I to the latest firmware and test again via ONVIF.

Workaround:

Adding DS-2CD2365G1-I via RTSP to IVSEC NVR tested OK. Strings used are listed below:

Mainstream: <rtsp://CAMIPADDRESS:554/Streaming/Channels/1>

Substream: <rtsp://CAMIPADDRESS:554/Streaming/Channels/2>
